

## WELL COMPLETION REPORT

NEW  REHAB  FILTER

CONSTRUCTED BY LWI – Angola  
(Who built the well?)

SPONSORED BY: LWI  
(Donor Sponsor name if other than LWI-who paid for the well?)

DATE OF WELL COMPLETION: July 31, 2008

COUNTRY: Angola

LOCATION: ELCIN, Oshidute, Cunene  
(Name of project, village or town)

GPS: 17 24 . 6 2 9 \_ \_ N  S , 0 1 6 4 1 . 3 3 3 \_ \_ E  W

(The E/W may have up to 3 digits to begin but may only have two)

GPS 29 37.93333 N  S , 95 34.20833 E  W   
(Example: Living Water International, Stafford, TX)

PROJECT NUMBER: AG080630VTL0808015020BYPNW  
(To be supplied by LWI)

## LIVING WATER INTERNATIONAL WELL COMPLETION REPORT

Information should be in Metric

### Completed Project Information

Altitude	<u>3634</u>
Total Depth	<u>21</u>
Static Level	<u>3</u>
Diameter of Casing--100mm = 4", 150mm = 6" , or 200mm = 8"	<u>110</u>
Start of Screen <u>12</u>	Stop of Screen <u>18</u>
Casing Material (Select one)	PVC <input checked="" type="checkbox"/> Steel <input type="checkbox"/>
Pump Type (Select one)	Submersible <input type="checkbox"/> IndiaMarkII <input type="checkbox"/> AFRIDEV <input type="checkbox"/> Other <input checked="" type="checkbox"/>
Depth of Cylinder	<u>10</u>
Liters Per Minute	<u>140</u>
Health & Hygiene (Check if completed)	<input checked="" type="checkbox"/>

### Identification of Problems

Please describe:

The present primary source of water is variable. There is an extremely small hand dug well. The water catchment source is about 12 kilometers away that may last another month.

People Served (Enter number of people, not families) 950

### Final Well Construction

#### WELL SEAL

Yes No

If 'No,' please explain:

#### WELL PAD CONSTRUCTION

UNICEF Standard: Yes No

If 'No,' please explain:

#### DISINFECTION OF THE WELL

Yes No

If 'No,' please explain:

**Description**

Please write a narrative description of the following:

GENERAL INFORMATION

Everything about this site was difficult. Just a few yards of the compacted gravel road our 5 ton truck sank into the powder sand. Many helped to help get set up and the whole community pitched in to get us out. It paid off for them with a good well.

The high sweat equity in the project will encourage them to take good care of the well.

TESTIMONIAL/EVANGELISM

A preaching point can remain just that, for many years. This well will be a determining factor for drawing people to make this a functioning congregation. Construction blocks are beginning to be bought and stacked at the site. There are only two to three hundred blocks at the moment, barely enough for the footings. However this is a sign of willingness to do kingdom building. The soft sand hindered us during the set up and drilling process. By God's grace the borehole remained open to install the casing. Plenty of clean water was provided by the Lord.

HYGIENE TEACHING

Women and children instructed on proper use of water.
